

SSL/TLS Certificate OrganizationalSSL

Activate secure HTTPS to secure online transactions. Organizational SSL Certificates provide instant identity confirmation and strong SSL protection for your website. It activates the browser padlock and the secure HTTPS protocol, shows your corporate identity, and assures your customers that you take security very seriously.

WHY USE AN ORGANIZATIONAL SSL CERTIFICATE?

- ✓ 2048-bit encryption: comply with industry best practices regarding encryption levels
- ✓ Quick verification of organization details: usually, 1-2 business day vetting turnaround
- ✓ Increased visitor trust and assurance: authentication of your organization's identity increases credibility and protects against imposters
- ✓ Affordable security from an established and respected SSL provider
- ✓ Secure single or multiple websites on one certificate with Wildcard SSL and Multi-domain SSL

ExtendedSSL

ExtendedSSL is the highest class of SSL available today. Its presence is an indicator of the website's validity and that website is owned and registered by a verified legitimate business.

WHY USE AN EXTENDEDSSL CERTIFICATE?

- ✓ Extended Validation is the highest class of SSL available
- ✓ Display organization name in browser: assures users of site legitimacy
- ✓ 2048-bit encryption: comply with industry best practices regarding encryption levels
- ✓ Quick verification of organization details: 3-4 business days vetting turnaround
- ✓ Affordable security from an established and respected SSL provider
- ✓ Secure single or multiple websites with Multi-DomainSSL
